10. Job Summary:			

The Project Technologist, under the direction of the assigned Manager, is responsible for ensuring that all projects developed and administered by BC Housing comply with the appropriate Design and Construction Standards. He/she/they conducts detailed plan and specification reviews, conducts site inspections during construction and provides contract administration services. The role also monitors the work of inspectors, architects, other consultants and general contractors.

11. Duties:

TECHNICAL SERVICES FOR PROVINCIAL HOUSING PROGRAMS:

- Ensures provincial housing program projects comply with BC Housing design and construction standards.
- Conducts site inspections to determine the feasibility of proposed developments by evaluating the physical characteristics including location, topography, configuration, access, utility services available, and impact of building and zoning regulations.
- Reviews and approves schematic design drawings, design drawings, and construction documents including working drawings, specifications, instructions to bidders, general requirements and supplementary general conditions.
- Reviews and approves addenda and change orders.
- Reviews requests for alternate materials and methods.
- Conducts inspections during construction to verify compliance with contract documents, and the schedule.
- Monitors contract close-out procedures and completion of deficiency items.
- Co-ordinates the one-year warranty inspection and completion of warranty items.

TECHNICAL SERVICES FOR THE DEVELOPMENT OF FACILITIES:

- Conducts pre-purchase site inspections to determine the feasibility of proposed developments by evaluating the physical characteristics including location, topography, configuration, access, utility services available, and impact of building and zoning regulations.
- Prepares a scope of work that addresses building deficiencies, modifications requested by the client and ensures compliance with the applicable regulatory requirements, the BC Building Code, and good construction practice.
- Prepares a construction estimate based on the proposed scope of work.
- Monitors the construction budget, schedule, and design throughout the development process.
- Reviews and approves the project design at the schematic design, design development, and construction document phases.

- Reviews requests for alternative materials and methods.
- Reviews and assembles all required bid documentation and co-ordinates the bidding process with the purchasing department.
- Reviews and approves addenda and change orders.
- Conducts inspections during construction to verify compliance with contract documents, reviews progress claims, and the schedule.
- Monitors contract close-out procedures and completion of deficiency items.
- Co-ordinates the one-year warranty inspection and completion of warranty items.

SUPERVISION OF CONSULTANTS ENGAGED IN THE DELIVERY OF NON-PROFIT HOUSING AND GROUP HOME PROJECTS:

- Reviews fee proposals and prepares consultant contracts for inspectors, geotechnical engineers, quantity surveyors and architects.
- Provides direction to consultant inspectors regarding their scope of work, including plan review content and frequency of field reviews.
- Reviews and evaluates consultants' activities by conducting supervisory plan reviews and site inspections.

TECHNICAL ASSISTANCE TO CONSULTANTS AND MINISTRY REPRESENTATIVES:

- Provides advice and information on design, construction cost, schedules, details, materials and methods.
- Interprets and clarifies the BC Housing Design and Construction Standards and reviews changes to regulatory requirements.

TECHNICAL AND ADMINISTRATIVE SERVICES RELATED TO CAPITAL PROGRAMS:

- Acts as contract administrator for consultant contracts. Monitors delivery of professional services by consultants, including the assessment, design, tendering, construction contract administration and post construction phases.
- Monitors the work of consultants to verify that they have met their contractual obligations, reviews invoices and confirms progress certification.
- Monitors the work of repair contractors to verify that they have met their contractual obligations. Reviews progress claims, submittals, mock ups, change orders, deficiencies and confirms progress certification.
- Prepares summary reports on the status of assigned projects to assist with the planning and coordination of the capital programs.
- Conducts technical research and assists with the preparation of standardized contract administration documents and procedures.
- Liaises with non-profit society representatives to review the scope of work throughout the delivery of the project.
- Provides information to support the building envelope repair litigation process.

OTHER

- Attends technical forums and seminars to maintain a good knowledge of current industry practice.
- Performs other related duties that do not affect the nature of the job, including participating on project task teams or assisting with special assignments
