Password Management

In the new year, BC Housing will launch a Password Management tool for Housing Connections. The tool will provide enhanced security by having users create their own password and requiring regular password changes every 90 days.

The first time a user accesses the system, they will be required to register by providing answers to a few security questions. Users will then be able to reset their own password if required.

If you have a password for Housing Connections, you will receive more information on the new password management tool and instructions for enrollment by email in the new year.
