Project Update

Integrated Health & Housing | 140 & 150 Ontario Street, Prince George

Dear Neighbour,

We are pleased to share that construction has started on the next phase of the Integrated Health and Housing site on 1st Avenue and Ontario Street. This phase will deliver a health clinic and 51 new homes with supports for people experiencing or at risk of homelessness in the community. The land for the site was generously provided by the City.

About the new building

The ground floor of the new building will house an approximately 9,000-square-foot health clinic. The clinic will provide residents and the public with various services to address their health concerns. It will have the address of 140 Ontario Street.

The supportive homes in the new building will be studio apartments for people who need support services to maintain their housing. Residents will be single adults (19+) of all genders, including seniors and people with disabilities. The new homes will have the address of 150 Ontario Street.

Connective is the operator of the existing supportive homes at 160 Ontario Street, and they will also manage the new homes at 150 Ontario Street when they are finished. Experienced staff will provide residents with 24/7 support services such as daily meals, life and employment skills training, and connections to community services.

Connective has a long history of providing innovative, person-centered services across BC and the Yukon. They offer a range of housing, life-skills outreach and employment and community-based services with the goal of assisting individuals to achieve greater independence. Learn more about Connective by visiting connective.ca.

Complex Care Housing services

We are also pleased to share that Northern Health will offer Complex Care Housing services in 10 of the 51 homes in the new building. These services will be in addition to the supports provided by Connective. Through this program, Northern Health will have dedicated staff to provide person-centered health care, specialized mental health and substance use services, and other culturally safe services to residents under one roof and in their own home.

Complex Care Housing is already being offered in 10 of the supportive homes in the neighbouring building at 160 Ontario Street. These services have also been a welcome addition to supportive housing programs across B.C. Learn more about Complex Care Housing by visiting gov.bc.ca/complexcarehousing.

Community Engagement

A caring community can contribute greatly to the success of supportive housing residents. We will continue to share updates and keep lines of communication open with neighbours as the project moves forward.
