

Nigel Valley Redevelopment

SAANICH

VISION STATEMENT

“A thriving and inclusive community where everyone feels at home and connected.”

BC Housing and four not for profit housing partners are working together to revitalize and regenerate lands within Saanich's uptown core. This mixed-use redevelopment aims to create a thriving and inclusive community with a range of accessible housing types, amenity spaces and employment opportunities. The mixed-use development would include approximately 123,000 square feet of community program space and approximately 800 housing units across five developments. The regeneration of this site would create homes across the housing continuum including affordable, assisted living, independent living and long term care serving a variety of people including seniors, families, and adults with a wide range of abilities.

Through thoughtful environmental design, this project aims to create resilient affordable urban housing, alongside green spaces to promote the growth of an inclusive dynamic neighbourhood. In addition to multiple housing types, this redevelopment would add pedestrian and bike paths, a public park and plaza, commercial units and community programming space. The project is currently underway with vital civil and infrastructure works already taken place. The Broadmead Care building began construction in March 2022 and is expected to be completed by summer 2024. The GVHS construction will begin in May 2022 with an estimated completion time of summer 2024. This large scale development will continue in phases, with the project timelines for each building being added to the website as they are confirmed.
